**Fish meal** is an excellent natural source of high quality protein & omega-3 fatty acids (EPA and DHA) essential vitamins and minerals. Mainly used in diets of domestic animals, poultry, and aquaculture. Fish meals are the best source of essential amino acids, fatty acids and other minerals that is required for the growth. We at Mangalore Marine Products do Continuous sampling of the fish meal to make sure the manufactured products are of International Quality Standards

Fish meals are added to the diet of most farm animals, for as high quality supplements to obtain efficient diets, particularly for Aqua feed, Fish feed and Poultry feed. The Productivity improvement through better growth and feed conversion, reduces the cost of animal production. Our Fish Meal Product is uniform grind, colour and protein content per shipment. Our Experts take maximum care to maintain all international parameters as per the specifications of customers. Normally Fish meal consists less fibre content, better nutrient digestibility and lack of anti-nutritional factors (ANFs) compared to plant protein meals. We are leading Fish meal Company in India with legacy of more than 40 years, Our Fish meal is trusted global markets and exported to Japan, Vietnam, Bangladesh & Srilanka

Specifications

Parameter	Limit	Standard	Monitoring

Dioxin Non-Dioxin like PCB's	---	As per BA 1	One test for every 1000 MT production

**Fish Oil** is major application in Pharmaceutical & animal feed industry mainly aquaculture and poultry. It contains two important omega-3 fatty acids that can be adsorbed easily, EPA & DHA mainly benefit in animal health with improved immunity against disease.

Fish Oil is natural balanced dietary supplement for its concentrations of Omega-3 fatty acids in aquaculture feed Industry. Omega -3 fatty acids contents are largely used in Pharmaceutical & Scientific research areas.

Mangalore Marne Products Fish oil is the best source of Vitamin A, D and E content.Sardine fish consists 20% of EPA (Eicosapentaenoic acid )and DHA (Docosahexaenoic acid). These are extracted by refining to increase its use-fulness in various industries like leather chemicals, printing inks, lubricants, greases and proactive coatings.

Our Sophisticated infrastructure and experienced professionals with industry expertise deliver global standard specifications fish oil to the end customer. We are leading fish oil manufactures in India, with 40 years of experience in domestic and international markets like Japan , Bangladesh & Srilanka.

# Fish Soluble Paste

## Specifications

Parameter	Limit	Standard	Monitoring
Protein	Min	35%	Every Batch
Moisture	Max	55%	Every Export
Antioxidant	Min	150(PPM)	once in a year

**Fish soluble paste** is a by-product derived from fish meal and fish oil. Fish Soluble are semi-viscous paste mainly used in aquaculture diets due to high level of amino acids. Fish Soluble consists high crude protien and a good substitute for fishmeal due to larger moisture and various growth promoting substances, mainly aminoacids that are essential for growth in animals or pets.

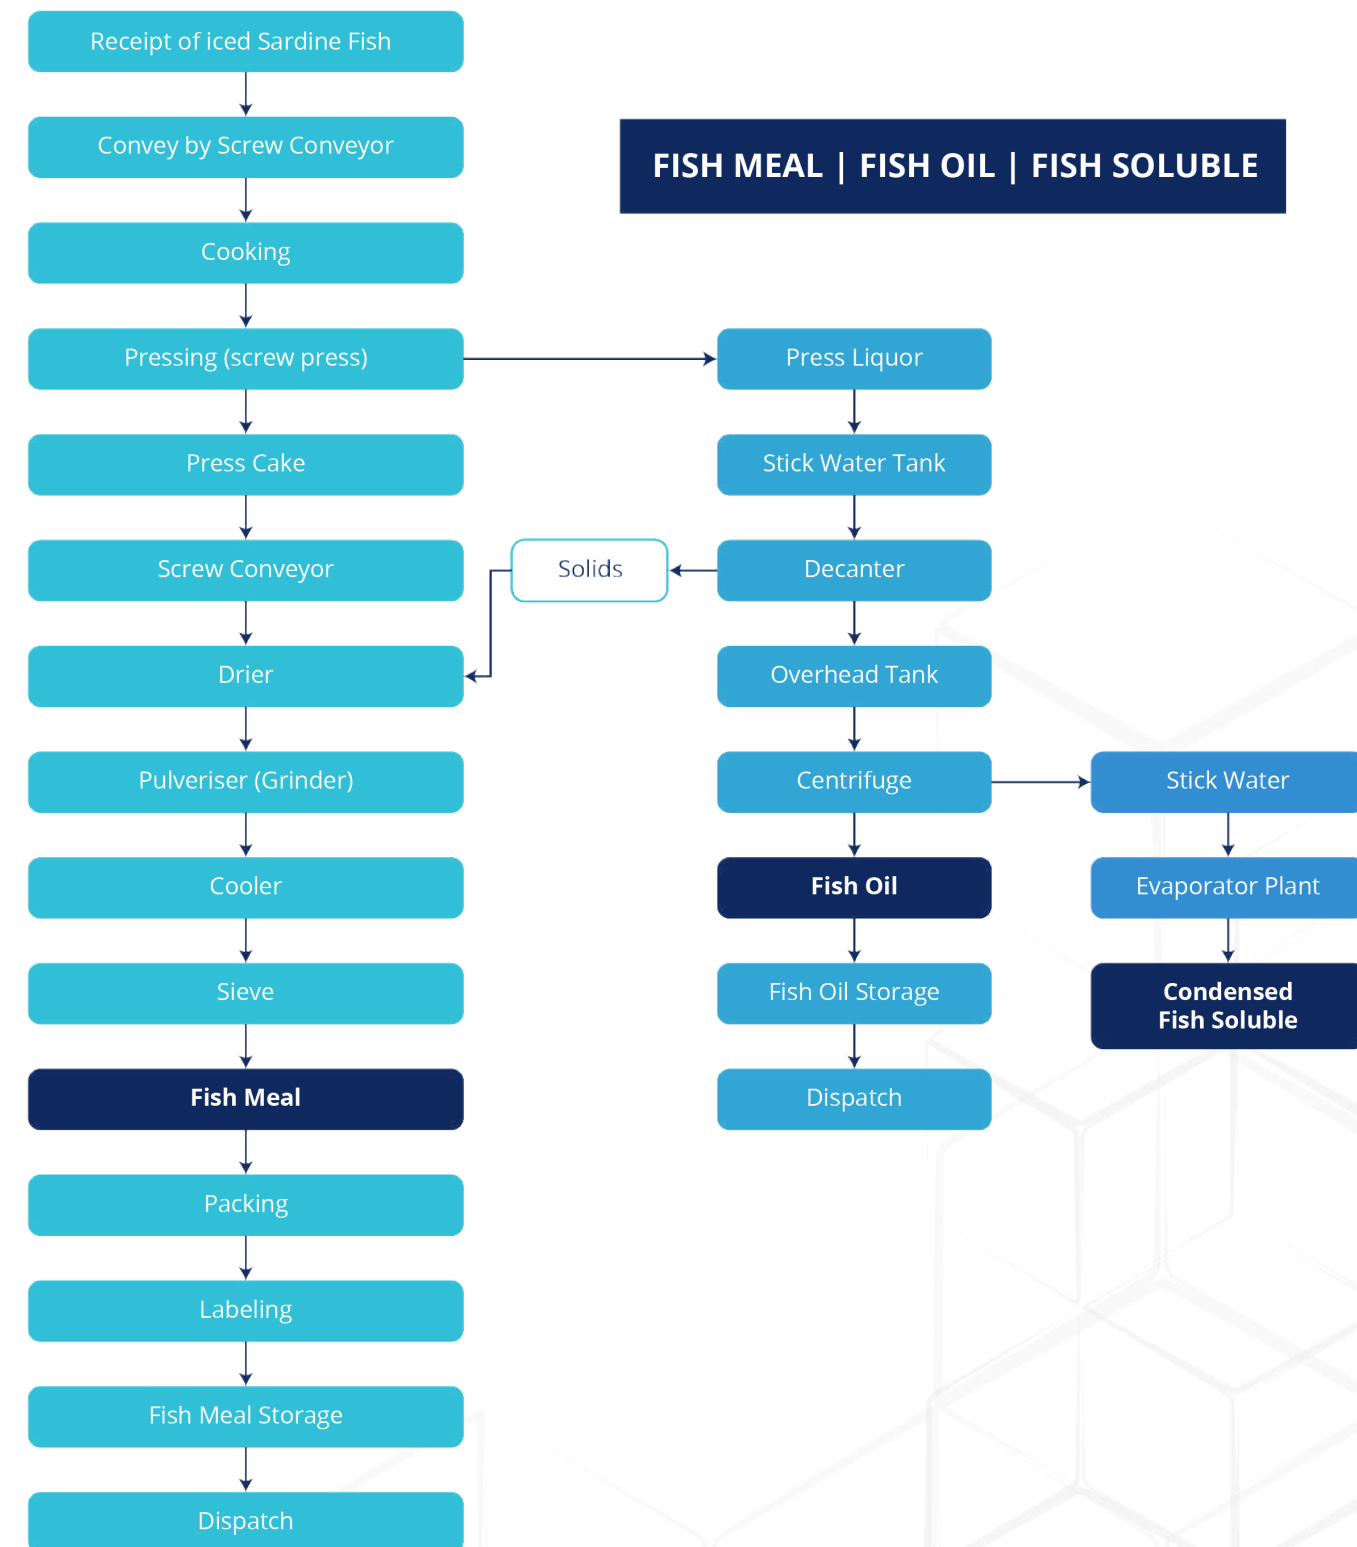

We at Mangalore Marine Products largest manufacturer of Fish Soluble paste with Industry Standard Specification export to domestic and international markets like Japan, Srilanka & Bangladesh. Our 40 years Experience in Fish meal Industry with niche customer base deliver high quality products across the globe.
